Independent Auditor's Report

To Mr. Jeff Wright
Genesee County Drain Commissioner
Division of Water and Waste Services
Flint, Michigan

We have audited the accompanying financial statements of the enterprise fund and internal service fund of the Genesee County Drain Commissioner Division of Water and Waste Services (a component unit of Genesee County, Michigan) (the "Division") as of December 31, 2007, which collectively comprise the Division's basic financial statements as listed in the table of contents. These basic financial statements are the responsibility of the Division's management. The prior year summarized comparative information has been derived from the Division's 2006 financial statements and, in our report dated April 21, 2006, we expressed unqualified opinions on the respective financial statements of the Enterprise Fund and Internal Service Fund.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the basic financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinions.

In our opinion, the basic financial statements referred to above present fairly, in all material respects, the respective financial position of the enterprise fund and internal service fund of the Genesee County Drain Commissioner Division of Water and Waste Services as of December 31, 2007 and the results of its operations and cash flows for the year then ended, in conformity with accounting principles generally accepted in the United States of America.

The management's discussion and analysis is presented for the purpose of additional analysis and is not a required part of the basic financial statements of the Genesee County Drain Commissioner Division of Water and Waste Services. We did not examine this data and, accordingly, do not express an opinion thereon.

To Mr. Jeff Wright
Genesee County Drain Commissioner
Division of Water and Waste Services

The accompanying supplemental information, as identified in the table of contents, is not a required part of the basic financial statements. The supplemental information is presented for the purpose of additional analysis. Our audits were conducted for the purpose of forming opinions on the financial statements that collectively comprise the Genesee County Drain Commissioner's basic financial statements. The supplemental information has been subjected to the auditing procedures applied in the audits of the basic financial statements and, in our opinion, is fairly stated in all material respects in relation to the basic financial statements taken as a whole.

In accordance with *Government Auditing Standards*, the report dated June 27, 2008 has been issued on our consideration of the enterprise fund and internal service fund of the Genesee County Drain Commissioner Division of Water and Waste Services' internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, grant agreements, and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide opinions on the internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* and should be considered in assessing the results of our audits.

Plante & Moran, PLLC

June 27, 2008

Genesee County Drain Commissioner

Division of Water and Waste Services

Management's Discussion and Analysis

The County Improvement Act established the Genesee County Drain Commissioner as a Public Act 342 Agency. That agency created the Division of Water and Waste Services (the "Division"). The Division provided public utility services of water and wastewater treatment in parts of Genesee, Saginaw, Shiawassee, and Livingston Counties. The Division's mission is to distribute water and collect and treat wastewater in such a manner that is in compliance with all state and federal regulations and to maintain the lowest cost to customers. Additionally, the Genesee County board of commissioners elected to have the Division act as County Enforcing Agency for Soil Erosion.

The Division of Water and Waste Services is responsible for the administration, operation, maintenance, and construction of infrastructure and treatment facilities for the communities located in Genesee County (the "County"), excluding the City of Flint, for the sanitary system and water supply. The Division is divided into six distinct cost centers (departments). These departments have been developed based upon revenue, responsibility, and definable core functions. The administration, support services, operation and maintenance, ARTP sewage treatment, Districts 3 and 7 sewage collection and treatment, and water supply operate autonomously, while sharing information with each of the other cost centers. In addition, the Division offers construction management and system operation services to local communities.

Some of the key administrative and engineering duties of both the sanitary sewer operation and the water department operation include comprehensive system planning, interaction and regulation of development, implementing capital improvement projects, and system budget management. The administration is responsible for the overall operation of the utilities services, engineering, and soil erosion in Genesee County. It is this department's responsibility to secure, allocate, and monitor funding, personnel, and equipment resources for the Division to ensure safe, reliable, and efficient operation of the utility.

The primary functions of the support services area are to efficiently and uniformly provide support to the six cost centers. These services can be grouped into these categories, whose core functions are as follows:

Safety - In support of the department heads, coordinates occupational safety, develops and coordinates safety training for new hires, and ensures compliance with federal, state, and local safety regulations

Human Resources - In support of the department heads, prepares and updates job descriptions, compensation schedules, personnel policies, conducts recruitment for all personnel, develops training programs for supervisors and managers, and maintains Division records related to personnel

Genesee County Drain Commissioner

Division of Water and Waste Services

Management's Discussion and Analysis (Continued)

Finance - Assists department heads to develop and administer annual budgets, maintains all financial records of the Division within generally accepted accounting principles and presents these records for annual audit, bond issues, and required reports; prepares and issues water and sewer bills, payroll, accounts receivable, accounts payable and assists departments in making purchases and maintaining inventory; it is responsible for ensuring that accurate, timely bills are issued and is instrumental in answering customer questions about water and sewer bills, processing service requests, and requests for transfer of service, and works with various municipalities in the processing of questions concerning the users of the system

Permits, Soil Erosion, and Construction Inspection - Manages all permitting, serves as contact coordinator between developers, contractors, municipalities, and the Division as related to development and connection to utilities; inspects construction of water and sewer system extensions to ensure compliance with Division standards

Information Technology - Installs and maintains Division computers, software systems, develops technical specifications, and provides training and technical support for all users of the Division's IT system

The operation and maintenance department has two primary functions: water distribution/delivery and sanitary sewer collection/transportation. To ensure that these primary functions are met, the operation and maintenance department performs the following tasks on a daily basis:

- Preventive maintenance of the water and sewer infrastructure and appurtenances
- Staking (Miss Dig) of water and sewer infrastructure
- Jetting/Televising of sanitary sewers
- Inspection of water and sewer infrastructure
- Responds to customer complaints (i.e., plugged sewers, high bills, etc.)
- Installs and repairs water meters, repairs broken watermain, repair and/or coordinate the repair of sanitary sewers, sewer main taps, and cut and cap services
- Provides after-hours emergency response

The sanitary sewer treatment sections are responsible for the collection and transmission of effluent through the sewer interceptor lines to the three disposal plants under the Division's jurisdiction. These plants are the Linden Facility, the Argentine/Deerfield Lagoons, and the Anthony Ragnone Treatment Plant (ARTP). The ARTP provides sewage treatment for all of the Division's service area with the exception of Districts 3 and 7. The District 3 and 7 facilities are two distinctly separate operations but are combined administratively due to topography and geography. The Division also manages two programs that impact its treatment facilities:

Genesee County Drain Commissioner

Division of Water and Waste Services

Management's Discussion and Analysis (Continued)

Biosolids Disposal - The Division is responsible for disposing wastewater treatment plant biosolids in a manner that is considered beneficial reuse, in particular sludge application on farmland. In 2005, ARTP applied 37.7 MG of stabilized biosolids (9554 DT) on approximately 3,400 acres of approved fields. District 3 applied 4.95 MG of stabilized biosolids (664 DT) on approximately 250 acres of approved fields. Three biosolids storage tanks were cleaned at ARTP by the end of the year, all were emptied, and all tanks were inspected. Tank atmospheric monitoring and ventilation has been increased to further ensure safe conditions. The Division is studying dewatering and other options for proper, cost-effective disposal.

District 3 - District 3 brought new plant facilities on line and into continued service to enhance treatment and better ensure compliance to higher flows and loading. Hartland Township began discharging to the Linden WWTP on March 20, 2007. The Livingston County septage receiving station began discharge on May 25, 2007.

Industrial Pretreatment Program - Under this program, the Division regulates and monitors industrial dischargers and nondomestic dischargers to the wastewater system. The Division is responsible for reviewing applications, issuing discharge permits, verifying compliance, and calculating fees and surcharge bills for the customers, as well as enforcing regulations through discharge permits, which protect the wastewater treatment facilities and the environment. Presently, there are 21 significant permits being monitored. An arsenic pilot program for drinking water systems was implemented to ensure compliance with MDEQ regulations. There are approximately 23 significant industrial facilities discharging to GCDC-WWS sewer systems. The Sewer Use Ordinance was approved by the MDEQ in early 2006 and the Board of Commissioners approved the Ordinance in November 2006. The new ordinance will allow for best management practices in regulating silver and mercury from over 500 physician and dental offices and grease and oil from approximately 1,500 restaurants. A mercury minimization program and fats, oil, and grease (FOG) programs have been implemented through the Best Management Practices (BMP). The new position of IPP supervisor was created and filled in 2006.

Genesee County Drain Commissioner

Division of Water and Waste Services

Management's Discussion and Analysis (Continued)

The core function of all treatment facilities is to effectively and efficiently treat sewage in compliance with regulations established by its NPDES permit and maintain good working relationships with customers and elected officials of the districts to achieve the goals of accountability and credibility. These activities include:

- Facility operation and maintenance
- Analytical support to ensure compliance with discharge limits and industrial pre-treatment
- Providing training in plant operation, maintenance, safety, and regulatory compliance
- Residuals management
- Addition of various treatment chemicals/other alternatives
- Planning for plant improvements, equipment replacement, and upgrades
- Emergency response plan
- Storage lagoon operation and maintenance
- Discharge limitations and monitoring
- Pollutant minimization

The water supply department is responsible for water supply acquisition from the City of Detroit through the City of Flint. The Division provides potable water to residential, commercial, and industrial customers with distribution of water to the outlying communities of Genesee County. It maintains a distribution system consisting of approximately 440 miles of water mains. The Division installs water connections at the request of customers, services and changes water meters, performs turn-ons and turn-offs at the request of customers, and oversees the backflow prevention program. In order to provide an uninterrupted supply of safe drinking water, this department also must look to the future to:

- Identify and evaluate water supply alternatives to meet normal and emergency needs
- Prepare cost estimates to construct, operate, and maintain selected alternative(s)
- Determine water treatment and pumping requirements
- Prepare cost estimates to construct, operate, and maintain selected alternatives

Through Genesee County, land was purchased along Lake Huron for the possible construction of a water plant and distribution system for Genesee County. The Division has first right of refusal on the property for development. The Division has been actively pursuing the information needed to make decisions regarding a long-term water supply solution, anticipating resolution through a joint study with other regional water supply partner(s) during 2007.

Genesee County Drain Commissioner

Division of Water and Waste Services

Management's Discussion and Analysis (Continued)

Objectives and Achievements

The main objectives of the Drain Commissioner are to maintain residential water and sewer rates that are fair and cost-effective to all concerned. Although not required by law, the Division maintains a yearly budget of income and expenses. This helps with planning for new and improved systems. The rising cost of water from the City of Detroit to the City of Flint and then to the County has been and is of great concern. With continued efforts and negotiations with the City of Flint, the Drain Commissioner and the Division of Water and Waste Services were able to amend the 1973 City/County Water Supply Agreement in 2003. The cost from the City of Detroit is passed through with no markup and a flat rate is paid to the City of Flint.

Beginning in January 1, 2005 and each calendar year thereafter through August 2008, the flat rate shall be adjusted for inflation in the amount of any annual average percentage increase in the Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W) for the preceding calendar year. The rate per month for 2006 has been established at \$109,289. A water rate study was completed in 2004, which establishes the rates to be charged by the Division with the concept of a flat rate structure to replace the original declining block rate structure. The study updates the rates from the Division for the period of 2004 through 2007. Under the 2004 agreement, Flint is to conduct and complete a study revision justifying their charges to the County based upon "true cost of service." This study is expected to modify the flat rate charged by the City in 2007. A sewer rate study has been completed and a rate adjustment was implemented in October 2007.

Rate Structure

The Division established a water rate in 2005 that separates Division costs from purchasing costs from Detroit and Flint. The rate structure requires automatic increases based upon Detroit/Flint increases. The rates also were developed on a five-year basis for the Division's operation and maintenance costs.

The sewer rate studies were completed in 2007. Sewer rate models have been developed for the next five years. The rate models for Districts 3 and 7 were completed and approved in May 2006. The I & T model is scheduled for an October 2008 approval.

Genesee County Drain Commissioner

Division of Water and Waste Services

Management's Discussion and Analysis (Continued)

Grant Acquisitions

- The Michigan State Police Emergency Management and Homeland Security Division reimbursed Genesee County Water and Waste Services approximately \$560,000 under the Hazard Mitigation Grant Program for Pump Station I.
- A STAG grant for work associated with the Western Trunk Sewer Extension and Northeast Extension Sewer was appropriated by the EPA for 2003 at \$1,403,700 and collected in 2004, \$625,000 for 2004, and \$250,000 for 2005 of which none had been collected. The Division has been advised of a STAG grant award for \$1.18 million. In 2007, \$1,178,600 was collected.
- Five Clean Water Revolving Fund Program loans were approved for \$22,180,000 and \$2,815,000, \$7,705,000, \$10,500,000, and \$4,335,000, respectively, to fund the Northeast Extension Sewer. Additionally, \$2,815,000, \$3,867,164, \$348,692, and \$3,874,780 were also collected in 2007. A single audit was conducted in accordance with standards applicable to *Government Auditing Standards* issued by the Comptroller General of the United States. Work was substantially complete in 2007. This report is available at the Drain Commissioner's office.

Using this Annual Report

This annual report consists of a series of financial statements. The statement of net assets, the statement of revenue, expenses, and changes in net assets, and the statement of cash flows provide information about the activities of the Division as a whole and present a longer-term view of its finances.

Change in net assets - Before capital contributions	480,383	(764,680)	1,245,063	(162.8)
Capital contributions	1,875,976	-	1,875,976	100.0
Change in net assets	\$ 2,356,359	\$ (764,680)	\$ 3,121,039	(408.1)

Genesee County Drain Commissioner

Division of Water and Waste Services

Management's Discussion and Analysis (Continued)

Major Capital Assets and Debt Activity

The Northeast Sewer Extension, at a cost of \$60,329,800, has been recognized as construction in progress, which has been funded by reserves and SRF funding from the state and federal governments. The SRF funding is described above under the acquisition of grants.

In 2007, bonds were issued in the amounts of \$6,000,000, \$8,000,000, and \$6,000,000 for the purpose of paying the costs of improvements and extensions to the County's water supply and sewer systems. These issues are being used for the construction of various water reservoirs and pumping stations for water distribution to the consumers of Genesee County and sewer treatment and collection. At December 31, 2007, the cost for water of \$10,759,792 and \$41,576,015 for the North Water Loop Phase III have been recognized as construction in progress.

During 2007, Capital Improvement Funds (CCIF) were used to pay the revenue debt associated with the Western Trunk and Water Supply III in the amounts of \$2,119,482.12 (water) and \$2,795,391.51 (sewer).

Financial Overview

In analyzing the Division of Water and Waste Service's financial position, it is important to recognize the mission of the agency, which has been previously stated. A discussion of the significant financial activity during the current year is as follows:

Statement of Net Assets

- Restricted cash assets increased in the current year by approximately \$5,416,000, primarily due to the issuance of Northeast Extension Sewer Project revenue bonds to cover a portion of prior year capital costs, the receipt of \$1,178,000 STAG grant and the issuance of Sewage Disposal System No. 3 revenue bonds of which a portion will be spent on capital costs in 2008. This activity is described in greater detail in the major capital assets and debt activity section.
- Other noncurrent assets also increased in the current year by approximately \$21,149,000, primarily due to the increase in the Division's construction in progress. This activity is described in greater detail in the major capital assets and debt activity section.

Genesee County Drain Commissioner

Division of Water and Waste Services

Management's Discussion and Analysis (Continued)

- Long-term debt increased in the current year due to the issuance of the following new bonds for construction: \$8,000,000 Northeast Extension Sewer Project revenue bonds, \$12,027,000 Clean Water Revolving Fund Program loans, \$6,000,000 Sewage Disposal System No. 3 revenue bonds, and \$6,000,000 Water Supply System Revenue Bonds. These new debt issuances along with annual debt service payments resulted in a \$23,337,000 net increase to long-term debt.
- Overall, total net assets increased by \$2,356,000 which is 1.8 percent change. This increase is the result of more favorable results of operations due to the rate increases.

Statement of Revenue, Expenses, and Changes in Net Assets

- Operating revenue in the current year increased by 20 percent primarily due to increased usage from customers and the increase in rates for sewage disposal and water supply.
- Operating expenses in the current year increased by 10 percent primarily due to increased water consumption and the recognition of approximately \$1,200,000 owed to the City of Flint for the Henderson Road storage tanks.
- Miscellaneous nonoperating revenue decreased 30 percent due to a decrease in CCIF revenue.
- Capital contributions of approximately \$1,876,000 are the result of STAG capital grant revenue and hazard mitigation capital grant revenue.

The following table shows the trend in total operating costs compared to flow volumes for sewage treatment:

	Year Ended December 31		
	2005	2006	2007
Total costs charged to townships	\$ 16,420,098	\$ 16,758,576	\$ 20,928,508
Total flow (thousands of gallons)	12,172,890	12,323,140	10,759,035
Cost per thousand of gallons	\$ 1.35	\$ 1.36	\$ 1.94

In 2007, metered water customers were charged \$2.57 for readiness to serve and a commodity charge of \$1.32 per 100 cubic feet of sewer. The sewer flat rate was increased mid-year to \$19.05. These rates are needed to cover estimated future costs for the operations capable of repairing and updating methods of treatment for better efficiency.

Genesee County Drain Commissioner

Division of Water and Waste Services

Management's Discussion and Analysis (Continued)

The following table shows the trend in total operating costs compared to efficiency of water purchased:

	Year Ended December 31		
	2005	2006	2007
Total costs charged to townships	\$ 14,923,675	\$ 14,375,301	\$ 15,326,315
Amount of purchased water (cu. ft.)	749,012,899	715,678,137	711,504,206
Amount of sold water	725,581,002	714,488,431	627,982,061
Water efficiency	97%	100%	88%

The Division purchases water from the City of Flint, which in turn purchases water from the City of Detroit. The Division's payment to Flint is a flat rate of \$112,786 per month plus a commodity charge equal to the charge from Detroit to Flint for water. For August 2006 through July 2007, the rate was \$11.09/mcf. As described previously, the flat rate will increase according to the CPI-W percentage. With these rates increasing each year, the Division had a water rate study completed in 2004. The study presented the concept of an inclining rate structure to which the Division implemented the rate changes as of January 1, 2005. The rate increases from Detroit to the City of Flint and then to the County are a pass-through to the customers from August 1, 2007 to the present and were \$11.35/mcf.

Contacting the Division's Management

This financial report is intended to provide our constituents, sewer/water users, and bondholders with a general overview of the Genesee County Drain Commissioner Division of Water and Waste Services accountability for the money it receives. These financial statements are included as a component unit of Genesee County and should be viewed as part of the government-wide financial statements. If there are questions about this report or if additional information is needed, we welcome anyone to contact the drain commissioner or the director of the Division.

During the year, there were no noncash operating, financing, or investing activities.

Genesee County Drain Commissioner

Division of Water and Waste Services

Notes to Financial Statements

December 31, 2007

Note 1 - Summary of Significant Accounting Policies

The Genesee County Drain Commissioner Division of Water and Waste Services (the "Division") was organized in September 1965 under Public Act No. 342 of 1939 of the State of Michigan (amended in 1967). The Division's major operations are the construction and operation of water and waste systems in Genesee County, Michigan (the "County") and certain areas in surrounding counties. Construction is financed with proceeds from the sale of bonds and federal and state grants. The operating activities are financed primarily through user charges to municipalities in the systems.

The financial statements of the Division have been prepared in conformity with accounting principles generally accepted in the United States of America (GAAP) as applied to governmental units. The Governmental Accounting Standards Board (GASB) is the accepted standard-setting body for establishing governmental accounting and financial reporting principles. The more significant of the Division's accounting policies are described below.

Reporting Entity - Included within the reporting entity are the following:

- Genesee County Sewage Disposal Systems Nos. 1, 2, 5, and 6 (interceptors and treatment facilities)
- Genesee County Sanitary Sewage Disposal Systems Nos. 3 and 7
- Genesee County Water Supply Systems
- Genesee County Division of Water and Waste Services - Vehicle and Equipment Fund (Internal Service Fund)

In evaluating how to define the Division for financial reporting purposes, management has considered all potential component units. The decision to include a potential component unit in the reporting entity was made by applying the criteria set forth in GAAP. The basic, but not the only, criterion for including a potential component unit within the reporting entity is the governmental body's ability to exercise oversight responsibility. The most significant manifestation of this ability is financial interdependency. Other manifestations of the ability to exercise oversight responsibility include, but are not limited to, the selection of governing authority, the designation of management, the ability to significantly influence operations, and accountability for fiscal matters. The other criterion used to evaluate potential component units for inclusion or exclusion from the reporting entity is the existence of special financing relationships, regardless of whether the Division is able to exercise oversight responsibilities. Based on the application of these criteria, there are no component units to be included in these basic financial statements.

Division of Water and Waste Services

Notes to Financial Statements

December 31, 2007

Note 1 - Summary of Significant Accounting Policies (Continued)

Measurement Focus, Basis of Accounting, and Financial Statement Presentation - The basic financial statements are reported using the economic resources measurement focus and the accrual basis of accounting. Revenue is recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows. Grants and similar items are recognized as revenue as soon as all eligibility requirements imposed by the provider have been met.

The Division reports the following major proprietary funds:

- The Enterprise Fund is used to account for operations that are financed and operated in a manner similar to private business enterprises, where the costs (expenses, including depreciation) of providing water and sewer services to the general public on a continuing basis are financed through user charges.
- The Internal Service Fund accounts for financing of goods and services provided by one department to other departments of the Division on a cost-plus basis.

The Division has elected, under GASB Statement No. 20, to apply all Financial Accounting Standards Board (FASB) statements issued after November 30, 1989, unless they conflict with the guidance of the Governmental Accounting Standards Board.

As a general rule, the effect of interfund activity has been eliminated from the basic financial statements. Exceptions to this general rule are charges between the Division's water and sewer function and various other functions of the Division. Eliminations of these charges would distort the direct costs and program revenues reported for the various functions concerned.

Proprietary funds distinguish operating revenue and expenses from nonoperating items. Operating revenue and expenses generally result from providing services and producing and delivering goods in connection with a proprietary fund's principal ongoing operations. The principal operating revenue of the Division's proprietary funds relates to charges to customers for sales and services. Operating expenses for proprietary funds include the cost of sales and services, administrative expenses, and depreciation on capital assets. All revenue and expenses not meeting this definition are reported as nonoperating revenue and expenses.

Genesee County Drain Commissioner

Division of Water and Waste Services

Notes to Financial Statements

December 31, 2007

Note 1 - Summary of Significant Accounting Policies (Continued)

Bank Deposits and Investments - Cash and cash equivalents are considered to be cash on hand, demand deposits, and short-term investments with a maturity of three months or less when acquired. Investments are stated at fair value, based on quoted market prices.

Short-term Financial Instruments - The fair value of short-term financial instruments, including cash and cash equivalents, trade accounts receivable and payable, accrued receivables, and accrued liabilities, is equal to the carrying amounts in the accompanying basic financial statements due to the short maturity of such instruments.

Receivables and Payables - Outstanding balances between funds are reported in the basic financial statements as "internal balances." All trade receivables are shown as net of an allowance for uncollectible amounts.

Inventories - Inventories consist primarily of water meters and grinder pumps, valued at cost, using the first-in, first-out method. The cost of supply inventory is recorded as an expense when consumed rather than when purchased.

Leases Receivable - Leases receivable consist of amounts due to the Division from various municipalities for construction activity. The Division constructs assets for various municipalities under Acts 185 and 342. Under these acts, the County issues bonds and constructs assets on behalf of municipalities. These assets are then leased by the municipalities over the life of the bonds. Lease payments approximate the debt service requirements of the associated bonds.

Local Unit Construction in Progress - Local unit construction in progress represents construction of water and sewer distribution and collection systems performed by the Division for local communities. The projects are recorded as an asset during the construction phase and are offset by an unearned lease. When the projects are substantially complete, the asset and unearned lease are removed from the basic financial statements and an asset is recorded by the local community.

Restricted Assets - Certain assets are restricted by the Division's bond ordinances for capital outlay. In addition, unspent bond proceeds and County capital improvement fees are restricted for the construction of water collection and sewage disposal systems projects. When an expense is incurred that allows the use of restricted assets (such as bond debt principal and interest), those assets are applied before utilizing any unrestricted assets.

Genesee County Drain Commissioner

Division of Water and Waste Services

Notes to Financial Statements December 31, 2007

Note 1 - Summary of Significant Accounting Policies (Continued)

Postemployment Benefits - In addition to the pension benefits described in Note 5, the Division provides postemployment health care, dental, and life insurance benefits after retirement through a contractual agreement. The Division is responsible for 100 percent of the cost of postretirement benefits and funds these costs as they are incurred. Postretirement benefits for retired employees were \$1,090,915 and \$969,132 for the years ended December 31, 2007 and 2006, respectively. The total number of eligible retirees amounted to 82 and 77 individuals during December 31, 2007 and 2006, respectively.

Compensated Absences - The Division's employees are granted vacation and personal leave in graduated amounts based on length of service. Vacation pay is fully vested when earned. Upon termination, employees are paid accumulated vacation at current salary rates to a limit of 150 percent of their current annual earned vacation. At December 31, 2007 and 2006, the Division has recorded a liability of approximately \$473,000 and \$467,000, respectively, for accumulated vacation leave.

Unearned Leases - Unearned leases represent cash and investments and construction in progress recorded on the Division's books, belonging to the municipalities participating in the water collection and sewage disposal system.

Use of Estimates - The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results could differ from those estimates.

Property, Plant, and Equipment - Additions to property, plant, and equipment are recorded at cost or, if donated, at their estimated fair value at the time of donation. Repairs and maintenance are recorded as expenses; renewals and betterments are capitalized. The sale or disposal of fixed assets is recorded by removing cost and accumulated depreciation from the accounts and charging the resulting gain or loss to income. Depreciation has been calculated on each class of property using the straight-line method based on the estimated useful lives of the assets, as follows:

Land improvements and underground networks	25-100 years
Buildings	50 years
Machinery and equipment	3-15 years

Genesee County Drain Commissioner

Division of Water and Waste Services

Notes to Financial Statements

December 31, 2007

Note 2 - Deposits and Investments

Michigan Compiled Laws Section 129.91 (Public Act 20 of 1943, as amended) authorizes local governmental units to make deposits and invest in the accounts of federally insured banks, credit unions, and savings and loan associations that have offices in Michigan. The local unit is allowed to invest in bonds, securities, and other direct obligations of the United States or any agency or instrumentality of the United States; repurchase agreements; bankers' acceptances of United States banks; commercial paper rated within the two highest classifications, which matures not more than 270 days after the date of purchase; obligations of the State of Michigan or its political subdivisions, which are rated as investment grade; and mutual funds composed of investment vehicles that are legal for direct investment by local units of government in Michigan.

The drain commissioner has designated three banks for the deposit of its funds. The investment policy adopted by the board in accordance with Public Act 196 of 1997 has authorized investment in bonds and securities of the United States government and bank accounts and CDs, but not the remainder of State statutory authority as listed above. The drain commissioner's deposits and investment policies are in accordance with statutory authority.

The drain commissioner's cash and investments are subject to several types of risk, which are examined in more detail below:

Custodial Credit Risk of Bank Deposits

Custodial credit risk is the risk that in the event of a bank failure, the drain commissioner's deposits may not be returned to it. The drain commissioner does not have a deposit policy for custodial credit risk. At year end, the drain commissioner had \$12,919,786 of bank deposits (certificates of deposit, checking, and savings accounts) that were uninsured and uncollateralized. The drain commissioner believes that due to the dollar amounts of cash deposits and the limits of FDIC insurance, it is impractical to insure all deposits. As a result, the drain commissioner evaluates each financial institution with which it deposits funds and assesses the level of risk of each institution; only those institutions with an acceptable estimated risk level are used as depositories.

Genesee County Drain Commissioner

Division of Water and Waste Services

Notes to Financial Statements December 31, 2007

Note 3 - Capital Assets

The following is a summary of proprietary fund type capital assets at December 31, 2007:

Division of Water and Waste Services

Notes to Financial Statements December 31, 2007

Note 3 - Capital Assets (Continued)

	Spent to Date	Remaining Commitment
Interceptor and treatment facilities	\$ 60,382,548	\$ 17,506,118
Sewage disposal system, District No. 3	16,978,918	912,673
Water supply system	23,172,337	444,629
Total	<u>\$ 100,533,803</u>	<u>\$ 18,863,420</u>

Note 4 - Bonds Payable

The Division issues bonds to provide for the construction of water and waste systems in Genesee County and certain areas in surrounding counties. General obligation bonds are direct obligations that pledge the full faith and credit of the government. Revenue bonds involve a pledge of specific income derived from the acquired or constructed assets to pay debt service and require certain financial covenants to be met. During the years ended December 31, 2007 and 2006, the Division was in violation of these covenants.

The following is a summary of bond transactions for the Division for the year ended December 31, 2007:

	Number of Issues	Interest Rate	Maturing Through	Balance January 1, 2007	Additions	Reductions	Balance December 31, 2007	Due Within One Year

Defeased Debt

During 2005, the Division issued \$15,840,000 in Limited Tax General Obligation Refunding Bonds with an average interest rate of 4 percent. The Division defeased \$5,525,000 of outstanding Series 1998 Sewage Disposal System Bonds by placing the proceeds of the new bonds in an irrevocable trust to provide for all future debt service payments. The remaining outstanding liability on the old bonds is \$190,000. Accordingly, the trust accounts' assets and liabilities for the defeased bonds are not included in the basic financial statements. The advance refunding reduced total debt service payments over the next 11 years by approximately \$382,000, which represents an economic gain of approximately \$289,000. At December 31, 2007 and 2006, \$5,525,000 and \$16,750,000, respectively, of bonds outstanding are considered defeased.

Note 5 - Pension Plan

Plan Description - The Division participates in the Genesee County Employees' Retirement System (GCERS), which is a contributory agent multiemployer defined benefit plan providing for pension and disability benefits for substantially all Genesee County employees. Each employer has the ability to negotiate and/or establish benefits through personnel policies. The authority to establish and amend the benefit provisions of the plan is governed by Act No. 156, Public Acts of 1851, as amended by the State of Michigan. The GCERS issues a publicly available financial report that includes financial statements and required supplementary information for the Division. That report may be obtained by writing to Genesee County Employees' Retirement System, 1101 Beach, Flint, MI 48502 or by calling 1-800-949-2627.

Funding Policy - The County's funding policy provides for periodic employer contributions at actuarially determined rates that, expressed as percentages of annual covered payroll, are designed to accumulate sufficient assets to pay benefits when due. The normal cost is determined using an attained age actuarial funding method.

Annual Pension Cost - During 2007 and 2006, the Division's annual pension cost of \$1,689,682 and \$1,582,066, respectively, was equal to the Division's required and actual contributions. The required contributions were determined as part of the December 31, 2006 and 2005 actuarial valuations, using the entry age actuarial cost method. Significant actuarial assumptions used include (a) a rate of return on the investment of present and future assets of 8.00 percent per year compounded annually and (b) projected salary increases of 5.00 percent to 9.03 percent per year compounded annually. Both (a) and (b) included an inflation component of 5.00 percent. The actuarial value of the Division's assets was determined using techniques that smooth the effects of short-term volatility in the market value of investments over a four-year period. The Division's unfunded actuarial accrued liability is being amortized as a level percentage of projected payroll on a closed basis, with the remaining amortization period at December 31, 2006 of 20 years.

Notes to Financial Statements

December 31, 2007

Note 6 - New Accounting Pronouncement

The Governmental Accounting Standards Board has recently released Statement Number 45, *Accounting and Reporting by Employers for Postemployment Benefits Other Than Pensions*. The new pronouncement provides guidance for local units of government in recognizing the cost of retiree health care, as well as any "other" postemployment benefits (other than pensions). The new rules will cause the government-wide financial statements to recognize the cost of providing retiree health care coverage over the working life of the employee, rather than at the time the health care premiums are paid. The new pronouncement is effective for the year ending December 31, 2008.

Note 7 - Risk Management

The Division is exposed to various risks of loss related to property loss, torts, errors and omissions, and employee injuries (workers' compensation), as well as medical benefits provided to employees. The Division has purchased commercial insurance for all claims. Settled claims have not exceeded the amount of insurance coverage in any of the past three fiscal years.

Note 8 - Contingencies and Commitments

Various claims and lawsuits are pending against the Division. One such lawsuit relates to the County Capital Improvement Fees (CCIF) reported in the I&T Division and the Water Division. These fees represent charges for connection to the water and sewer systems in relation to system expansion. The Division had collected approximately \$13,214,000 as of December 31, 2005. In 2006, a judgment in the Appellate Court was rendered in favor of the Division. Therefore, no liability has been recognized in the financial statements. Because of the judgment, \$3,663,790 was used to pay on the debt issued for the Western Trunk Relief Sewer and Water Supply III. In 2006, the case was in appeals with the Michigan Supreme Court, and the appeals were denied. No further action occurred during 2007. All other claims and lawsuits, in the opinion of management, will not have a significant effect on the Division's basic financial statements.

To the Drain Commissioner
Genesee County Drain Commissioner
Division of Water and Waste Services

We have recently completed our audit of the basic financial statements of Genesee County Drain Commissioner Division of Water and Waste Services (the "Division") for the year ended December 31, 2007. In addition to our audit report, we are providing the following letter of increased audit communications, required audit communication, summary of unrecorded possible adjustments, and other recommendations which impact the Division:

	<u>Page</u>
Report on Internal Control	2-8
Results of the Audit	9-11
Summary of Unrecorded Possible Adjustments	12
Other Recommendations	13-14

We are grateful for the opportunity to be of service to the Genesee County Drain Commissioner Division of Water and Waste Services. Should you have any questions regarding the comments in this report, please do not hesitate to call.

June 27, 2008

Report on Internal Control Over Financial Reporting and on Compliance
and Other Matters Based on an Audit of Financial Statements
Performed in Accordance with *Government Auditing Standards*

To Mr. Jeff Wright
Genesee County Drain Commissioner
Division of Water and Waste Services
Flint, Michigan

We have audited the financial statements of the Enterprise Fund and Internal Service Fund of Genesee County Drain Commissioner Division of Water and Waste Services (a component unit of Genesee County, Michigan) (the "Division") as of and for the year ended December 31, 2007, which collectively comprise the Division's basic financial statements, and have issued our report thereon dated June 27, 2008. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States.

Internal Control Over Financial Reporting

In planning and performing our audit, we considered the Division's internal control over financial reporting as a basis for designing our auditing procedures for the purpose of expressing our opinions on the basic financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Division's internal control over financial reporting. Accordingly, we do not express an opinion on the effectiveness of the Division's internal control over financial reporting.

Our consideration of internal control over financial reporting was for the limited purpose described in the preceding paragraph and would not necessarily identify all deficiencies in internal control that might be significant deficiencies or material weaknesses. However, as discussed below, we identified certain deficiencies in internal control over financial reporting that we consider to be significant deficiencies and other deficiencies that we consider to be material weaknesses.

A control deficiency exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect misstatements on a timely basis. A significant deficiency is a control deficiency, or combination of control deficiencies, that adversely affects the entity's ability to initiate, authorize, record, process, or report financial data reliably in accordance with generally accepted accounting principles such that there is more than a remote likelihood that a misstatement of the entity's financial statements that is more than inconsequential will not be prevented or detected by the entity's internal controls. We consider the control deficiencies described below as findings 2007-1/2006-3, 2007-2/2006-4, and 2007-3 to be significant deficiencies in internal control over financial reporting.

To Mr. Jeff Wright
Genesee County Drain Commissioner
Division of Water and Waste Services

A material weakness is a significant deficiency, or combination of significant deficiencies, that results in more than a remote likelihood that a material misstatement of the financial statements will not be prevented or detected by the entity's internal control. Our consideration of the internal control over financial reporting was for the limited purpose described in the first paragraph of this section and would not necessarily identify all deficiencies in the internal control that might be significant deficiencies and, accordingly, would not necessarily disclose all significant deficiencies that are also considered to be material weaknesses. We believe the deficiency described below as finding 2007-4 constitutes a material weakness.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the Division's basic financial statements are free of material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit and, accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

This report is intended solely for the information and use of management, the Drain Commissioner, and others within the Division and is not intended to be and should not be used by anyone other than these specified parties.

Very truly yours,

Plante & Moran, PLLC

Leslie J. Pulver, CPA

To Mr. Jeff Wright
Genesee County Drain Commissioner
Division of Water and Waste Services

Reference Number	Findings
2007- 1/2006-3	<p>Bond Premiums and Discounts</p> <p>Finding Type - Significant deficiency</p> <p>Criteria - Bond premiums and discounts should be capitalized and amortized over the life of the bond as required by Governmental Accounting Standards Board regulations.</p> <p>Condition - Net bond premiums have not been recorded or amortized as of the balance sheet date for amounts incurred prior to December 31, 2006.</p> <p>Context - A net premium of approximately \$187,000 has not been recorded or amortized over the life of its respective bonds.</p> <p>Cause - The Division's finance department was unaware that the premium amount needed to be recorded on the financial statements in conjunction with the debt from which the premiums arose. During 2007, the Division recorded premiums related to the issuances during the current fiscal year.</p> <p>Effect - Liabilities and expenses are understated in each of the years over which the unrecorded bond premiums would be amortized.</p> <p>Recommendation - We recommend that the bond premium and discount amounts be recorded and amortized over the life of their respective bonds as required by Governmental Accounting Standards Board regulations for the premiums and discounts incurred prior to December 31, 2006.</p> <p>Views of Responsible Officials and Planned Corrective Actions - The Division is now aware that these amounts be recorded in conjunction with the corresponding debt and amortized over the same time as the original debt issues, all new bonds with associated premiums and discounts have been recorded properly.</p>

To Mr. Jeff Wright
Genesee County Drain Commissioner
Division of Water and Waste Services

Reference Number	Findings
2007- 2/2006-4	<p>Year End Adjustments</p> <p>Finding Type - Significant deficiency</p> <p>Criteria - All appropriate activity should be accurately recorded in each accrued liability and receivable accounts at the balance sheet date.</p> <p>Condition - Adjustments for interest payable related to debt, interest receivable from local communities, and adjustments to deferred revenue was not properly recorded in the general ledger.</p> <p>Context - Unrecorded amounts for interest payable related to debt, interest receivable from local communities, and adjustments to deferred revenue amounted to approximately \$495,000, \$155,000, and \$630,000, respectively.</p> <p>Cause - The Division did not review these receivable and accrued amounts to ensure that all necessary amounts had been properly recorded.</p> <p>Effect - Certain asset and liability accounts are under or overstated at the balance sheet date.</p> <p>Recommendation - The Division should develop a checklist that will enable them to make certain that all pertinent accounts have been reviewed for the appropriate activity, specifically at year end.</p> <p>Views of Responsible Officials and Planned Corrective Actions - The Division believes that the majority of these transactions were the cause of “nontriggering events” in which invoices had not been received by year end, or in which there would not have been any other indicator that money was owed or receivable from another entity. The Division will properly review these accounts at year end for proper adjustments.</p>

To Mr. Jeff Wright
Genesee County Drain Commissioner
Division of Water and Waste Services

Reference Number	Findings
2007-3	<p>Bond Covenants</p> <p>Finding Type - Significant deficiency</p> <p>Criteria - The Division has bond covenants related to various revenue bond series that require a certain level of bond reserves and rate structures to cover operating and debt service requirements.</p> <p>Condition - The Division does not monitor the bond covenant requirements at year end or throughout the year.</p> <p>Context - The Division currently does not meet all of the required covenants.</p> <p>Cause - The Division did not review their covenants throughout the year to determine that they were appropriately met. Specifically, two of the enterprise sub-funds did not charge a rate to cover the operating expenses in addition to the debt service requirements.</p> <p>Effect - Violation of bond covenants could trigger a call from borrowers of the bonds.</p> <p>Recommendation - The Division should monitor its bond covenants throughout the year and ensure that adequate rates are charged to cover the related bond requirements.</p> <p>Views of Responsible Officials and Planned Corrective Actions - The Division will review all bond covenant requirements and will develop a schedule to compute the bond reserve and rate structure requirements. These requirements will be monitored throughout the year. Rates will be adjusted as necessary to comply with these requirements.</p>

To Mr. Jeff Wright
Genesee County Drain Commissioner
Division of Water and Waste Services

Reference Number	Findings
2007-4	<p>Adequate and Timely Financial Reporting</p> <p>Finding Type - Material weakness</p> <p>Criteria - The Division's general ledger was not balanced for the year ended December 31, 2007 until June 2008. Additionally, the Division required a significant number of entries to convert their general ledger from a cash basis to accrual basis in conformity with accounting principles generally accepted in the United States of America as applied to governmental units. Finally, the general ledger did not reconcile to the subsidiary systems of the Division for cash, accounts payable, accounts receivable, and other receivables/accruals.</p> <p>Condition - The Division does not have the appropriate accounting processes in place to adequately record and report all required adjustments for completion of monthly, quarterly, and annual financial statements.</p> <p>Context - The Division converted general ledger software in the current year, and was unable to spend the appropriate time to verify the accuracy of the system before its use, creating unbalanced funds in the general ledger. Additionally, the Division does not have the appropriate accounting processes in place or the appropriate oversight for completion of monthly, quarterly, and annual financial statements.</p> <p>Cause - Technology issues in the current year went unresolved for the majority of the year, creating the inability for a proper year-end close as planned by the Division.</p> <p>Effect - The general ledger remained unbalanced for more than six months subsequent to year end, along with a significant number of adjusting entries being required to convert to an accrual basis in conformity with accounting principles generally accepted in the United States of America as applied to governmental units.</p>

To Mr. Jeff Wright
Genesee County Drain Commissioner
Division of Water and Waste Services

Reference Number	Findings
2007-4 (Continued)	<p>Adequate and Timely Financial Reporting (Continued)</p> <p>Recommendation - The Division should perform monthly, quarterly, and annual processes to reconcile all accounts and record all appropriate entries. This will allow management to receive timely information to make timely and informed decisions.</p> <p>Views of Responsible Officials and Planned Corrective Actions - The Division changed Microsoft partners in 2008 and a complete audit of all financial software was completed resulting in a number of significant changes to the software. Additionally, extensive retraining will take place with Division staff to ensure proper recording of accounting transactions.</p> <p>The Division will contract with an outside accounting consultant in 2008 to oversee that proper accounting processes are in place to adequately record and report financial data. The accounting consultant will be ensuring that the general ledger is balanced and reconciled to all subsidiary ledgers, and prepare monthly, quarterly, and annual financial statements. Additionally, the Division is interviewing for the position of assistant finance manager. Should the Division fill this position, that person would assume the responsibilities of the accounting consultant.</p> <p>Subsequent to the completion of the 2007 audit, the unrecorded receivables adjustment for current assets was reduced from (\$631,902), as reported in the summary of unrecorded possible adjustments, to (\$98,827). Additional reconciliation of subsidiary ledgers to the general ledger continues to take place in order to bring the two into balance.</p>

Results of the Audit

June 27, 2008

To Mr. Jeff Wright
Genesee County Drain Commissioner
Division of Water and Waste Services

Dear Mr. Wright:

We have audited the financial statements of Genesee County Drain Commissioner Division of Water and Waste Services (the "Division") for the year ended December 31, 2007, and have issued our report thereon dated June 27, 2008. Professional standards require that we provide you with the following information related to our audit.

Our Responsibility Under U.S. Generally Accepted Auditing Standards

As stated in our engagement letter dated November 13, 2007, our responsibility, as described by professional standards, is to express an opinion about whether the financial statements prepared by management with your oversight are fairly presented, in all material respects, in conformity with U.S. generally accepted accounting principles. We are responsible for planning and performing the audit to obtain reasonable, but not absolute, assurance that the financial statements are free of material misstatement. As part of our audit, we considered the internal control of Genesee County Drain Commissioner Division of Water and Waste Services. Our consideration of internal control was solely for the purpose of determining our audit procedures and not to provide any assurance concerning such internal control.

We are responsible for communicating significant matters related to the audit that are, in our professional judgment, relevant to your responsibilities in overseeing the financial reporting process. However, we are not required to design procedures specifically to identify such matters and our audit of the financial statements does not relieve you or management of your responsibilities.

Our audit of the Division's financial statements has also been conducted in accordance with *Government Auditing Standards*, issued by the Comptroller General of the United States. Under *Government Auditing Standards*, we have made some assessments of the Division's compliance with certain provisions of laws, regulations, contracts, and grant agreements. While those assessments are not sufficient to identify all noncompliance with applicable laws, regulations, and contract provisions, we are required to communicate all noncompliance conditions that come to our attention. We are required to communicate any conditions in the report on internal control over financial reporting and on compliance and other matters included with this package. No such conditions were required to be communicated.

To Mr. Jeff Wright
Genesee County Drain Commissioner
Division of Water and Waste Services

We also are obligated to communicate certain matters related to our audit to those responsible for the governance of the Division, including certain instances of error or fraud and significant deficiencies in internal control that we identify during our audit. In certain situations, *Government Auditing Standards* require disclosure of illegal acts to applicable government agencies. If such illegal acts were detected during our audit, we would be required to make disclosures regarding these acts to applicable government agencies. No such disclosures were required.

Planned Scope and Timing of the Audit

We performed the audit according to the planned scope and timing previously communicated to you in our letter about planning matters dated April 8, 2008.

Significant Audit Findings

Qualitative Aspects of Accounting Practices

Management is responsible for the selection and use of appropriate accounting policies. In accordance with the terms of our engagement letter, we will advise management about the appropriateness of accounting policies and their application. The significant accounting policies used by Genesee County Drain Commissioner Division of Water and Waste Services are described in Note 1 to the financial statements. No new accounting policies were adopted and the application of existing policies was not changed during the year.

We noted no transactions entered into by the Division during the year for which there is a lack of authoritative guidance or consensus.

There are no significant transactions that have been recognized in the financial statements in a different period than when the transaction occurred.

Accounting estimates are an integral part of the financial statements prepared by management and are based on management's knowledge and experience about past and current events and assumptions about future events. Certain accounting estimates are particularly sensitive because of their significance to the financial statements and because of the possibility that future events affecting them may differ significantly from those expected. The most sensitive estimate affecting the financial statements was the recording of unbilled revenue at year end.

Management's estimate of the unbilled receivables is based on amounts billed subsequent to year end. We evaluated the key factors and assumptions used to develop the unbilled receivables in determining that it is reasonable in relation to the financial statements taken as a whole.

Difficulties Encountered in Performing the Audit

We encountered no significant difficulties in dealing with management in performing and completing our audit.

To Mr. Jeff Wright
Genesee County Drain Commissioner
Division of Water and Waste Services

Corrected and Uncorrected Misstatements

Professional standards require us to accumulate all known and likely misstatements identified during the audit, other than those that are trivial, and communicate them to the appropriate level of management. The attached schedule summarizes uncorrected misstatements of the financial statements. Management has determined that their effects are immaterial, both individually and in the aggregate, to the financial statements taken as a whole. There were significant material misstatements detected as a result of audit procedures that were corrected by management related to cash to accrual transactions, specifically receivables, payables, construction in progress, and classification of net assets.

Disagreements with Management

For the purpose of this letter, professional standards define a disagreement with management as a financial accounting, reporting, or auditing matter, whether or not resolved to our satisfaction, that could be significant to the financial statements or the auditor's report. We are pleased to report that no such disagreements arose during the course of our audit.

Management's Representations

We have requested certain representations from management that are included in the management representation letter dated June 27, 2008.

Management's Consultations with Other Independent Accountants

In some cases, management may decide to consult with other accountants about auditing and accounting matters, similar to obtaining a "second opinion" on certain situations. If a consultation involves application of an accounting principle to the organization's financial statements or a determination of the type of auditor's opinion that may be expressed on those statements, our professional standards require the consulting accountant to check with us to determine that the consultant has all the relevant facts. To our knowledge, there were no such consultations with other accountants.

This information is intended solely for the use of the Drain Commissioner and management of Genesee County Drain Commissioner Division of Water and Waste Services and is not intended to be and should not be used by anyone other than these specified parties.

Very truly yours,

Plante & Moran, PLLC

Leslie J. Pulver

	None								-
									-
									-
	Combined Effect	\$ (496,645)	\$ -	\$ 282,323	\$ -	\$ -	\$ 133,013	\$ 911,981	\$ (778,968)

Other Recommendations

Genesee County Drain Commissioner Division of Water and Waste Services

Other Recommendations

During the course of our audit, and in addition to the above mentioned significant deficiencies and recommendations, we present the following observations and recommendations in order to increase the accuracy and integrity of the Division's financial reporting.

- Several bank reconciliations were not dated or signed by the preparer, nor were being reviewed by an independent individual. We recommend that the preparation of all bank reconciliations be evidenced with signatures and dates and that an individual independent of the cash receipts, cash disbursements, and general ledger review, date, and sign the bank reconciliations.
- Wire transfers are not dated or signed by the preparer, nor were being reviewed by an independent individual. We recommend that all wire transfers be evidenced with signatures and dates and that an individual independent of the cash receipts, cash disbursements, and general ledger review, date, and sign the transfers.
- General journal entries are not reviewed by an individual other than the preparer. We recommend that all general journal entries be reviewed by an individual other than the preparer of the general journal entry.
- Receivable balances owed from local units and compensated absences owed to employees, as detailed on supporting schedules prepared by the Division, did not agree to the general ledger. We recommend that all detail supporting schedules be reviewed and reconciled to the general ledger.
- The Division will be required to implement GASB No. 45, as described in the footnotes to the financial statements, for the year ended December 31, 2008. As such, we encourage the Division to consider two separate, yet related items. The first consideration is whether or not the pension liability will be funded. Should the Division decide to fund this liability, there will be a significant impact on the Division's budget. The ramifications of such an impact should be contemplated sooner rather than later. The second consideration is how the expense for this pension liability will be funded. There are several potential avenues the Division could pursue, ranging from funding it out of current operating revenues, to passing the cost along to the Division's consumers by funding through an increase in service rates. Regardless of the avenue the Division chooses, we recommend that the necessary and appropriate actions be initiated in the near future.
- Our review of the internal controls related to the Division's information technology systems have resulted in several recommendations that have been presented directly to the information technology department through a separate communication.
